                                               The Comprehensive R Archive Network
  Download and Install R
  Precompiled binary distributions of the base system and contributed packages, Windows and Mac users most likely want one of these versions of R:
        Download R for Linux
       Download R for (Mac) OS X
Download R for Windows
  R is part of many Linux distributions, you should check with your Linux package management system in addition to the link above.
  Source Code for all Platforms
  Windows and Mac users most likely want to download the precompiled binaries listed in the upper box, not the source code. The sources have to be
  compiled before you can use them. If you do not know what this means, you probably do not want to do it!
     • The latest release (2015-08-14, Fire Safety) R-3.2.2.tar.gz, read what's new in the latest version.
     • Sources of <u>R alpha and beta releases</u> (daily snapshots, created only in time periods before a planned release).
     • Daily snapshots of current patched and development versions are <u>available here</u>. Please read about <u>new features and bug fixes</u> before filing
        corresponding feature requests or bug reports
      • Source code of older versions of R is available here

Download RStudio

RStudio is a set of integrated tools designed to help you be more productive with R. It includes a console, syntax-highlighting editor that supports direct code execution, as well as tools for plotting, history, debugging and workspace management.

If you run R on a Linux server and want to enable users to remotely access RStudio using a web browser please download RStudio Server.

Do you need support or a commercial license? Check out our commercial offerings

RStudio Desktop 0.99.484 — Release Notes

RStudio requires R 2.11.1 (or higher). If you don't already have R, you can download it here.
